

# CSE 461 HW2

## REPORT

EMRE SEZER

1901042640

## How to Test:

You need to have a computer with 64 bit Microsoft operating system. Visual Studio has to be installed at it.

You should open the file named “cse461\_hw2\_1901042640.sln” for opening the project. Then, click the “Start With Debugging” button on the top or alternatively push “Ctrl + F5” buttons on keyboard.

If project doesn't compile, you need to follow the steps below:

- Click Project tan on top and select cse461\_hw2\_1901042640 Properties.
- Go to VC++ Directories.
- Open the project folder then Libraries\include. Copy the address path to Include Directories section.
- Open the project folder then Libraries\lib. Copy the address path to Include Library Directories section.
- Run the project.
